FESTIVAL DES JEUX Carcassonne

A time travel
to find the city treasure

Find the city treasure ...

Find the 4 fragments of the map and go to the place where the biggest golden Meeple is hidden to save the city.

In the heart of the peaceful medieval city of Carcassonne, stood the Meeple kingdom. Governed by a powerful magician king, he always had a sacred map in his possession.

There are rumours that this map indicates the location of the treasure of the city of Carcassonne. According to the legend, this treasure was held by the great golden Meeple and would grant any wish.

One day, a threatening shadow tried to steal the King's map and turned all the villagers into ghosts. King Meeple tried to use his powers to banish the shadow, but he failed.

Powerless against his enemy and forced to give him the sacred map, he divided it into 4 pieces, opened temporal rifts and entrusted each of them to his most loyal subjects. He asked them to hide the fragments throughout time in the hope that one day, heroes would come to liberate the city by collecting the four pieces of the map and using the city's treasure to break the curse.
